

NANCY MEDINA

SKILLS

Languages & Scripting: Python (scripting & automation), SQL (Advanced, stored procedures, structured data extraction), PostgreSQL, Oracle SQL, JavaScript, Java, C++, HTML, CSS, Bash/Shell Scripting

Data Engineering: ETL & Data Pipelines, Data Extraction & Normalization, Data Quality & Validation, Data Correlation & Trending, Relational Databases (Oracle, SQL Server), Dashboard Design, KPI Reporting

Integration & Infrastructure: REST APIs, API-based data syncs, SQL-based scheduled syncs, Linux (CLI), Microsoft SQL Server Management Studio, Git, Azure DevOps

AI & ML Tools: Claude (Anthropic), ChatGPT (OpenAI)

Visualization: Power BI, SSRS, Tableau, Dynatrace, VMware Aria, Excel (Pivot Tables)

Collaboration: Stakeholder Communication, Requirements Gathering, Cross-functional Collaboration (network, security, cloud teams), Testing, Training & Support

EMPLOYMENT HISTORY

DATA ENGINEER

Oct 2022 – Present

Amentum

Richland, WA

- ◆ Led development of a full-stack internal web application (HTML/CSS front end, Python back end) integrating REST APIs and SQL Server databases to automate reporting and operational workflows, with source control and CI/CD managed through Azure DevOps, reducing manual processes by over 40%.
- ◆ Designed dashboards using Power BI, Dynatrace, VMware Aria, and OEM with KPI reporting to monitor performance of 50+ servers, ensuring peak performance and uptime.
- ◆ Leveraged SQL and data visualization tools to analyze application performance pre- and post-patch, pinpointing root causes of instability and resolving the 3 biggest causes of crashes.
- ◆ Queried ServiceNow ticket data using SQL and built Power BI dashboards, reducing manual reporting by 30%.
- ◆ Audited Application Lifecycle Management (ALM) documentation, identifying and correcting 50+ inconsistencies in data definitions and process flows; improved data accuracy and reduced rework.

IT DATA ANALYST

Aug 2021 – Oct 2022

Amazon

Seattle, WA

- ◆ Trained an internal machine learning moderation system by reviewing and labeling 500+ employee email communications, improving the model's ability to detect policy violations.
 - ◆ Automated onboarding of 100 email accounts into the AI moderation pipeline using Bash scripting, reducing manual configuration time and improving scalability.
 - ◆ Enhanced email moderation processes by creating interactive Tableau dashboards to track moderator performance, leading to a consistent top-10 ranking for response efficiency.
 - ◆ Used HR systems (PeopleSoft) to activate and configure 200+ user accounts, partnering with HR and management to ensure proper access setup.
-

EDUCATION

Bachelor of Science in Computer Science

Ellensburg, WA

Central Washington University — partial completion

Associate of Arts

Yakima, WA

Yakima Valley College — President's List & Dean's List
